PROFESSIONAL EXPERIENCE

Web Development for BCH Arquitectura

I designed and developed the website for BCH Arquitectura, ensuring that it reflected the firm's visual identity and values. I used React to create a smooth and modern user experience, highlighting the studio's most important projects in a responsive design accessible on all types of devices.

ACADEMIC BACKGROUND

Universidad Don Torcuato Ditella

Licenciatura en Diseño

2018-2024

Carrera en FrontEnd-Coderhouse

Coderhouse • Web development

Course in which I learned to create a website from a paper prototype, following best web development practices with HTML and CSS. I learned to apply Bootstrap and finally to upload my site to a server.

Coderhouse • JavaScript

Course in which I learned the fundamentals of JavaScript and its tools for web development. I worked with libraries like jQuery and development techniques like AJAX.

Coderhouse • ReactJS

Course in which I learned to program with JavaScript and ES6, work with Firebase, and develop SPA web applications using React JS, leveraging the virtual DOM and the framework's hooks.

Coderhouse • App development

In the foundational course of Application Development, I learned to use React Native, integrate features like camera and geolocation, and manage data with Firebase and SQLite. I also covered mobile app deployment.

Colegio St. Catherine's Moorlands School

Graduado de Secundaria Bilingüe Nacional con enfoque en Ciencias y Humanidades.
