

ABOUT ME

I'm a proactive, social person who likes to take on a challenge and is constantly looking for self-improvement. I have a well-rounded understanding of design, user experience, and front-end development as well as how to combine the visual and the functional to give the user the best experience possible.

Responsive website for different platforms designed with React JS

ACADEMIC BACKGROUND

Universidad Don Torcuato Ditella

Licenciatura en Diseno

2018-2024

Carrera en FrontEnd-Coderhouse

Coderhouse • Web development

Course in which I learned to create a website starting from a paper prototype and considering best practices in web development, using HTML and CSS. I learned to apply Bootstrap and finally to upload my site to a server.

Coderhouse • JavaScript

Course in which I learned the fundamentals of JavaScript and the tools it offers for web development. I worked with libraries such as jQuery and with development techniques like AJAX.

Coderhouse • ReactJS

Course in which I learned to program with components using JavaScript and ES6. I also worked with data flows, Firebase, and understood the importance of the virtual DOM. I acquired knowledge to develop SPA web applications using React JS and to make efficient use of the hooks provided by this framework.

Colegio St. Catherine's Moorlands School

National Bilingual High School Graduate with a Focus on Sciences and Humanities
